

## Welcome to Sinclairity!

This month in the New Product Section we focus on Sinclair's innovative new Cross-Band Couplers and Compact Hybrid Couplers.

We are also proud to announce the winner of the Disguised Antenna Naming Contest in the News Flash Section.

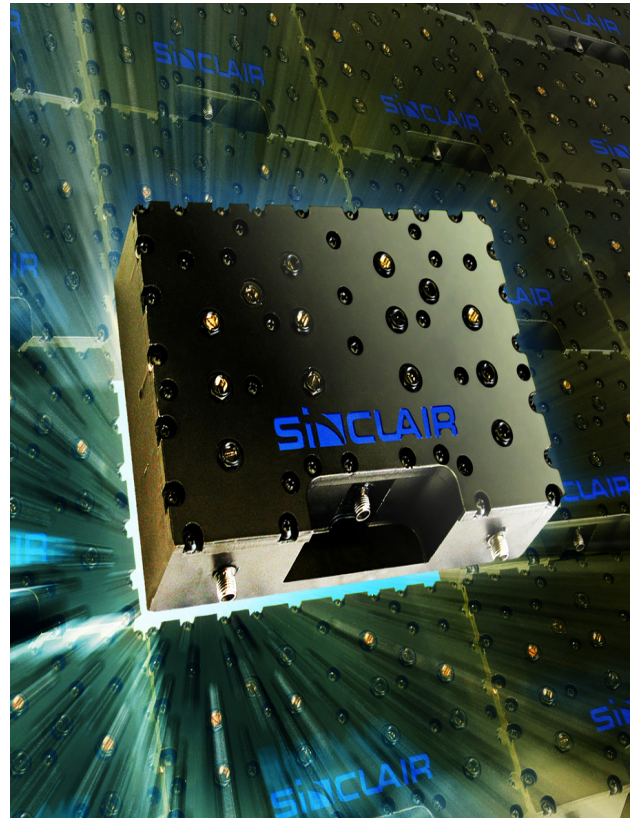

As always we welcome your suggestions, please feel free to email us at: [marketing@sinctech.com](mailto:marketing@sinctech.com)

### ABOUT THIS PHOTO

An impressive Sinclair COMSHEL Antenna Shelter sits on top of the rugged mountains of Beautiful British Columbia. For more info on our COMSHEL Series please contact Sinclair customer service at: 1-800-2633275.

If you too have a photo of a Sinclair product in the field you would like to share, we would love to hear from you, email us: [marketing@sinctech.com](mailto:marketing@sinctech.com)

## Product Showcase

### Sinclair Introduces New Compact Hybrid Couplers

Presenting the new wide-band compact hybrid couplers from Sinclair. Compared to traditional couplers, our latest hybrid couplers are significantly smaller in size.

These wide-band hybrid couplers cover the full frequency range of 130-180 MHz for the VHF band, 225-520 MHz for the UHF band and 500-1000 MHz for the 800 MHz band.

The new hybrid couplers will complement Sinclair's Next Generation Transmitter Combiners and Compact Transmitter Combiners, to offer cost effective and space efficient hybrid-ferrite type combiners.

Based on this cutting edge technology, Sinclair also plans to release a new series of high power compact hybrid-ferrite transmitter combiners by the end of 2009. Hybrid-ferrite transmitter combiners are used to combine closely-spaced multiple channels into a single transmission antenna, 2 channels, 4 channels, 6 channels, etc., while saving rack space.

For more product information please contact Sinclair customer service today at: 1-800-263-3275.

### Cross-Band Couplers

Sinclair's new cross-band couplers are the ideal choice for obtaining the maximum performance out of your SM300 and SM600 series multifunctional transport antennas.

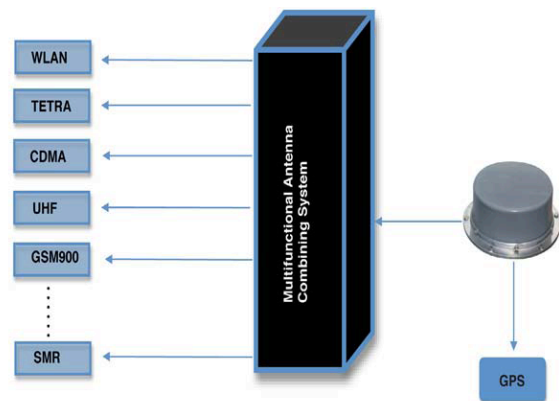

These cross band couplers are available as part of an easy to install expansion kit, which enables the use of one antenna to operate several radio systems at different frequencies. The modular design of the expansion kit helps you avoid messy cables and multiple installations. It also saves space and creates flexibility for future utilization of the antenna.

As your needs change our experienced staff can help you upgrade your antenna system to accommodate additional frequencies.

### Features:

- Wide pass bands allow the combination/separation of any 138-960 MHz with 1710-2500 MHz signals.
- Add DCS, PCS or AWS BDA to an existing Cellular and/or SMR DAS.
- Enable feeder and antenna sharing.
- High power handling for multi-service applications.

For more information on how cross-band coupler expansion kits can be utilized to maximize performance of your SM300 and SM600 antennas please download a product brochure or call customer service at 1-800-263-3275.

## News Flash

### Results of the Disguised Antenna Naming Contest

We are pleased to announce that Sinclair's Patented SHA Series Disguised Bumper Antenna Series will now be called the "Stealthwave™ Series"

### New addition to the Stealthwave™ Series" Disguised Bumper Antennas: SHA311, UHF Antenna

After the successful launch of its patented Disguised VHF band Antenna, Sinclair has recently released the UHF version of this antenna- SHA311, which covers the 380-512 MHz range.

These wide-band antennas have a bandwidth of 20 to 50MHz (depending on vehicle type). The 800 MHz version of this versatile antenna will also be released soon. For more details visit: [sinctech.com](http://sinctech.com) or call our Customer Service team at 1-800-263-3275.

### Coming Soon: Multilingual Sinclair Corporate Literature

For the first time in Sinclair's history our corporate literature will now be available in two major international languages: Spanish and French. This is in keeping with the growing demand for Sinclair's products in the international markets. The literature will be available for download through our website by September 2009. For more details visit: [sinctech.com](http://sinctech.com) or call our Customer Service team at 1-800-263-3275.
